EDUCATION

Dayananda Sagar College of Engineering

Bachelor of Engineering in Computer Science

CGPA: 9.4

Bengaluru, India

December 2021 - June 2025

Deeksha Pre-University College

Degree in 12th Grade

Percentage: 96%

Bengaluru, India

June 2019 - June 2021

Venkat International Public School

Degree in 10th Grade

Percentage: 93%

Bengaluru, India

May 2017 - March 2018

EXPERIENCE

Target | Software Developer Apprentice

Bengaluru, India | August 2025 - Present

- Contributing to development of an in-house deployment platform aimed at replacing Spinnaker to improve scalability and reduce external dependencies.
- Working on a utility function for audit trail using Javers framework to enhance data change tracking.
- Designing a pull-based mechanism that, on request, retrieves and displays the currently active action triggers (e.g., ring device, auto-turn off WiFi after inactivity) from endpoint devices.
- Implementing backend APIs and service modules using Micronaut and Kotlin to detect non-compliant endpoint devices and provide remediation instructions.

Nokia | SDE Intern

Bengaluru, India | August 2024 - March 2025

- Developed an automated aggregator for 5G microservices that bundled services together, allowing engineers to configure versions and deployments through an intuitive interface.
- Built dynamic and interactive UI components with forms, dropdowns, input validation, and real-time feedback to improve usability and streamline service bundle creation.
- Contributed to developing REST APIs that processed user inputs to generate Helm charts for automated service deployments.

SKILLS

Programming Languages: Python, HTML, CSS, JavaScript, TypeScript, C++, SQL

Libraries/Frameworks: NodeJS, React, Flask, Bootstrap, Micronaut

Databases: MongoDB, MySQL

PROJECTS / OPEN-SOURCE

Code Canvas | [Link](#)

TypeScript, NodeJS

- Built a VS Code extension that lets developers add sticky notes directly to lines of code for context, reminders, or ideas, with over 300+ installs.
- Implemented full CRUD functionality for creating, editing, and deleting notes and customizable color-coded categories.
- Added category-based filtering to help developers quickly focus on relevant notes within the code.
- Enabled seamless persistence of notes and categories across sessions using local JSON files.
- Improved code readability without cluttering the code by displaying notes as unobtrusive gutter icons.

Royal Public School Website : Freelance | [Link](#)

HTML, CSS, Bootstrap, JavaScript

- Developed and launched the official website for Royal Public School, enhancing their online presence and accessibility.
- Integrated Google Analytics to monitor traffic, track user behavior, and identify areas for optimization.
- Implemented responsive design to ensure a seamless experience across all devices and screen sizes.

VS Code HackerRank Extension : Open-source | [Link](#)

HTML, CSS, JavaScript

- Developed a custom timer popup component supporting both Stopwatch and Countdown modes using HTML, CSS, and JavaScript.
- Implemented dynamic input validation, mode switching, and smooth popup transitions for enhanced user experience.
- Designed responsive button behaviors and time-up alerts integrated with VS Code notifications API.

Ping-You | [Link](#)

Python, MongoDB

- Created a Telegram bot that tracks messages in subscribed groups based on user-defined keywords, sending alerts to the user to avoid missing important messages in high-traffic groups.
- Enabled users to add, remove, and list keywords for specific groups via simple bot chat commands.
- Allowed users to view all subscribed groups and track keywords across groups for better management.
- Added support for paginated keyword viewing and buttons for smooth navigation and improved user experience.

Checks Notifier | [Link](#)

JavaScript, MongoDB

- Developed a Slack bot that sends direct message notifications to users when their GitHub check runs fail, improving developer awareness and reducing CI/CD troubleshooting time.
- Integrated GitHub webhooks (*checkrun* / *checksuite*) to process events in real time and trigger Slack notifications.
- Managed user subscriptions with `/subscribe` and `/unsubscribe` commands using MongoDB.
